Stan and Everyone,

Dalls Lankford's URM-25D rebuild notes and the Hollow State Newsletter (HSN) are both so inexpensive it would be cheaper for you to get them directly from the publisher. The rebuild notes are \$1 and a subscription to HSN is \$5 for 4 issues. The publisher is Ralph Sanserino, PO Box 1831, Perris, CA 92572-1831. Highly Recommended.

Tom

PS The HSN started out covering the R-390A but now has branched out to

include other military and commercial vacuum tube communications receivers.

Message-ID: <199708030256.WAA07526@brickbat8.mindspring.com>

Dear Fellow BA's--I have an AB HRO 50 coil(25-35mhz) in excellent condx that I would like to trade for a C coil(40mtr). Possible someone out there has an extra C coil for sale if not interested in a trade. Please let me know???

If someone out there has the knowledge and would be willing to share it, then I think a quickie rundown of which British military services used the "bathtub" telegraph key, in what era, with which types of British/Commonwealth/European radio equipment, and in what venues (i.e. aircraft, shipboard, landbased, lorry, Gunga-Din rickshaw, etc.), would be most appreciated. 99% of the List's focus is on U.S.-built BAs, so a little elucidation on the 1% might be nice.

73,

Paul, K4MSG

Message-ID: <33E42279.68F6@erols.com>

WANTED: Lionel-built J-36 bugs *without* nameplates, any condition (including damaged, partials, and "parts" bugs). A Lionel J-36 looks just like a Vibroplex Lightning Bug and has a black wrinkle base, very dull nickel plated top parts, and 4 to 7 small holes (or tiny stud heads) along the left side as you face the knob end (this is where the long, narrow nameplate would have been mounted).

Cash only, no trades. *NOT* interested in Vibroplex or Bunnell J-36s, or Lionels with intact nameplates. E-mail replies to bocks@erols.com or paul.bock@pulse.com.

73,

Paul, K4MSG

Well here it goes....

I missed the BA Freq test for BA hetrodyne madness last time around but now am hardware heavy and willing to try it ifn it happens again. Other than radios sounding like the spectrum is in the Quisenart I'd like to try these recently bought for cheap beasties for real. If y'all have any info on these critters lemme know: BC221, two versions Q and AH both old nasty and ready, LM21: NIB (from Ray Mote) but Navy similar, Gertsch FM3 like but 20mhz-1ghz. I may be shaky but these old things check out OK against lab gear and a 51S1 receiver etc! Como se 'va....?!?!
